National Science Foundation funded

SUMMER INTERNSHIP

For Teachers and Students

In Dr. Hanna Salman's Laboratory

30 hours a week for 4 weeks

During July and August 2017

Starting date flexible

TEACHERS: EARN \$5,000

STUDENTS: EARN \$1,400

The internship aims to help teams of teachers and students learn biological physics lab techniques, by participating in current research conducted in the laboratory of Dr. Hanna Salman. Each team will be formed of one high school science teacher and one high school student. At the end of the internship, the teams are expected to evaluate their project and determine which aspects of it could possibly be added to the high school's science curriculum, and assist in sharing this work with their schools and other high schools in the Pittsburgh area.

Prior knowledge of biological physics is NOT expected, however priority will be given to those with some background in physics or biology.

Application Deadline: May 31, 2017

Successful candidates will be informed by June 15, 2017

Interested individuals, or teams, should submit their application containing a CV (2-page maximum) and 1-page cover letter explaining why they are interested in this internship, and which project they would like to join. Information regarding the available projects can be found at: <http://salmanhanna.wixsite.com/salman-lab/research>

Applications should be submitted to:
